SUBJECT INDEX

1A tetraphenylsulfurane
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
2A tetraphenylselenurane
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
3A tetraphenyltellurane
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373

1B 2,2′-biphenylylenediphenylsulfurane
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
2B 2,2′-biphenylylenediphenylselenurane
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
3B 2,2′-biphenylylenediphenyltellurane
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373

PII S0010-8545(98)00225-2

1C bis(2,2′-biphenylylene)sulfurane
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
2C bis(2,2′-biphenylylene)selenurane
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
3C bis(2,2′-biphenylylene)tellurane
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
1 triphenylsulfonium hexafluorophosphate
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
2 diphenyl sulfoxide
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
3 diphenyl sulfide
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
4 diphenyl sulfide
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
5 triphenylselrnonium bromide
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
6 diphenyl selenoxide
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
7 diphenyl selenide
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
8 2,2′-biphenylylenephenylsulfonium salt
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
9 2,2′-biphenylylenephenylselenonium salt
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
10 2,2′-biphenylylenephenyltelluronium salt
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
11 dichlorodiphenyltellurane
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
12 phenyl *o*-terphenyl sulfide
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
13 phenyl *o*-terphenyl selenide
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
14 phenyl *o*-terphenyl telluride
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
15 dibenzothiophene
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
16 dibenzoselenophene
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
17 dibenzotellurophene
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
18 dibenzothiophene *s*-oxide
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373
19 2,2′-dilithobiphenyl
Recent progress in hypervalent organochalcogenuranes bearing four carbon ligands 373

Alkalimetal
Recent developments in cyclopentadienyl-alkalimetal chemistry 17
Alkaline earth metal
Synthesis, properties, and reactivity of alkaline earth metal bis[bis(trialkylsilyl)amides] 157
Aluminium
Cationic group 13 complexes 407
Amide addition
A new route to sulfur polyimido anions $S(NR)_n^{m-}$: reactivity and coordination behavior 431
Aminotroponiminates
Aminotroponiminato complexes of silicon, germanium, tin and lead 67

Antimony
Chalcogenidometalates of the heavier Group 14 and 15 elements 211
Arsenic
Chalcogenidometalates of the heavier Group 14 and 15 elements 211
Azadiboriridines
Tri-*tert*-butylazadiboriridine: a molecule with a basic boron—boron bond 135

Basic bonds
Tri-*tert*-butylazadiboriridine: a molecule with a basic boron—boron bond 135

Cages
Synthetic applications of p block metal dimethylamido reagents 373
Chalcogenidometalates
Chalcogenidometalates of the heavier Group 14 and 15 elements 211
Charge transfer complex
Charge transfer complexes and electron transfer reaction of organosilicon and related compounds 87
Coordination
Bidentate organophosphorus ligands formed via P–N bond formation: synthesis and coordination chemistry 451
Cyclopentadienyl
Recent developments in cyclopentadienyl-alkalimetal chemistry 17

Dimethylamido
Synthetic applications of p block metal dimethylamido reagents 373
Dimethylzirconocene
Zirconium species as tools in phosphorus chemistry: II [Cp_2ZrMe_2], a useful reagent 1
Diphosphines
Medium-ring diphosphines: synthesis and transannular chemistry 113

Gallium
Cationic group 13 complexes 407
Terminal chalcogenido complexes of Group 13 and 14 elements 323
Germanium
Terminal chalcogenido complexes of Group 13 and 14 elements 323
Chalcogenidometalates of the heavier Group 14 and 15 elements 211
Group 13 cations
Cationic group 13 complexes 407

Halogen oxidation
A new route to sulfur polyimido anions $S(NR)_n^{m-}$: reactivity and coordination behavior 431

Imido
Synthetic applications of p block metal dimethylamido reagents 373
Indium
Terminal chalcogenido complexes of Group 13 and 14 elements 323
Cationic group 13 complexes 407

Ligands
Aminotroponiminato complexes of silicon, germanium, tin and lead 67

Medium-rings
Medium-ring diphosphines: synthesis and transannular chemistry 113
Metal atoms
Synthesis, properties, and reactivity of alkaline earth metal bis[bis(trialkylsilyl)amides] 157
Molecules
Synthesis, properties, and reactivity of alkaline earth metal bis[bis(trialkylsilyl)amides] 157

Organogermanium compound
Charge transfer complexes and electron transfer reaction of organosilicon and related compounds 87
Organophosphorus
Bidentate organophosphorus ligands formed via P–N bond formation: synthesis and coordination chemistry 451
Organosilicon compound
Charge transfer complexes and electron transfer reaction of organosilicon and related compounds 87

p block
Synthetic applications of p block metal dimethylamido reagents 373
Phosphinidene
Synthetic applications of p block metal dimethylamido reagents 373
Phosphorus–nitrogen
Bidentate organophosphorus ligands formed via P–N bond formation: synthesis and coordination chemistry 451
Phosphorus
Zirconium species as tools in phosphorus chemistry: II [Cp_2ZrMe_2], a useful reagent 1

Photo-induced electron transfer
Charge transfer complexes and electron transfer reaction of organosilicon and related compounds 87
Polyanions
Chalcogenidometalates of the heavier Group 14 and 15 elements 211

Reaction sequence
A new route to sulfur polyimido anions $S(NR)_n^{m-}$: reactivity and coordination behavior 431
Ring expansion
Tri-*tert*-butylazadiboriridine: a molecule with a basic boron—boron bond 135

Sandwich compounds
Recent developments in cyclopentadienyl-alkalimetal chemistry 17

Sulfur polymido anions
A new route to sulfur polyimido anions $S(NR)_n^{m-}$: reactivity and coordination behavior 431

Tin Chalogen
Terminal chalcogenido complexes of Group 13 and 14 elements 323
Tin
Chalcogenidometalates of the heavier Group 14 and 15 elements 211
Tranisition metal
Bidentate organophosphorus ligands formed via P–N bond formation: synthesis and coordination chemistry 451
